

Fostering impact on Society through Open Science and Talent Attraction

LUISS HISTORY

Founded in 1974 by a group of entrepreneurs led by Umberto Agnelli, **Luiss was conceived as an innovative project to educate the future leaders of society**. Since then, the University - named in honor of Guido Carli, then President of Confindustria and later President of Luiss - has built an educational model deeply connected to the worlds of business and institutions, where **social responsibility and knowledge transfer are core elements of its Third Mission**.

INTERVENTION AREAS

Research careers and talent support

- Supporting talent circulation and mobility

Research modus operandi

- Mainstream of Open Science and digitalisation of Research
- Public engagement with and outreach to society to solve social challenges

Finance

- Sustainability in Research

TRANSFORMATION ACTIONS

- Improve incentive policies to attract ERC and MSCA talents.
- Reduce existing barriers to the understanding and adoption of Open Science and further promote coordination among the various university areas involved in Third Mission activities.
- Increase number of applications on research excellence projects such as MSCA and ERC through standardized processes, incentive policies, communication activities, and training opportunities.

ACCOMPLISHMENTS

Luiss University has undertaken significant institutional steps to advance research excellence, talent attraction, Open Science, and societal impact.

In this context, several awareness initiatives have been implemented, including a special issue of the Research & Third Mission News book entirely dedicated to Open Science and a permanent section within the same publication — the “Open Science Corner” — featuring international updates and key developments in the field.
